**IN THE CLAIM**

Please amend claim 1 to read as follows. The "marked-up" version of the amended claim is provided in the APPENDIX attached hereafter.

- c/o C.J.*
1. (Amended) A method of progressive time stamp resolution in a multimedia presentation comprising the steps of:  
*BX*  
 supplying a player of a multimedia presentation with information comprising two labels, one for a multimedia object's start time and one for the multimedia object's end time relative to other multimedia object start and stop times, and three durations, a minimum duration, a maximum duration and a preferred duration for each multimedia object prior to starting playback of the multimedia object; and
